

EpiCH Community Building Task Force
Mission
September 2015

The purpose of this task force is to build the community of EpiCH through social events while fostering a sense of community networking. We feel the events will build a stronger sense of community and collaboration with all faculty, staff and students involved. By holding community building events beyond our day-to-day responsibilities we will be building upon the foundation of the University, SPH and the Division. All community building events will allow social interaction with faculty, staff and students to generate more awareness of public health efforts.

The Community Building Task Force will plan and implement social and outreach events that will cater to the needs and interests of public health, both internally and broadly, and that will contribute to building a sense of community at EpiCH as well as in the community at-large.

The Community Building Task Force will obtain feedback from the faculty, staff and students to determine the success of our efforts and to keep abreast of what would be of interest to those in the Division and School.
